

ULTIMATE

VISION

www.vikking.eu

We are proud to present our exclusive collections of composite doors — the result of passion, masterful craftsmanship, and an unrelenting pursuit of perfection. Designed for those who appreciate not only security and functionality, but also aesthetics of the highest international standard.

Our doors are more than just an element of architecture — they are a conscious expression of style, prestige, and refined taste. Every line, texture, and detail has been meticulously crafted for those who seek exceptional design, enduring durability, and timeless elegance.

By combining the latest technologies with carefully selected materials, we have created a product that unites flawless design with innovative functionality. This refined fusion of modernity and classic elegance makes our doors an integral part of any luxurious interior — and a distinguished statement piece for every exterior.

Welcome to a world where every detail matters, and luxury becomes a part of everyday life. The composite doors from our collection are more than an entrance to your home — they are an entryway to a realm of unparalleled comfort, timeless beauty, and flawlessly refined style.

A handwritten signature in white ink, reading "Tadeusz Konaszuk". The script is fluid and cursive, with a prominent flourish at the end of the last name.

THE NEXT LEVEL OF PERFECTION

UNIQUE CONSTRUCTION

The uncompromising fusion of a composite frame with a door leaf made from the same material represents a true technological breakthrough — one that redefines the very concept of a door. It is the result of a multi-stage design process where engineering precision meets advanced material technology. The final form captivates with its design as confidently as it delivers lasting reliability.

line
ULTIMATE

EXCEPTIONAL DURABILITY

The use of fiberglass in our composite doors reflects a deliberate technological choice, delivering durability that surpasses conventional standards. This material resists deformation, weathering, and the passage of time, ensuring the door retains its flawless form. These are doors designed not just for today, but for the future — crafted with consistently high expectations in mind.

line
VISION

ENERGY EFFICIENCY

The advanced design of our composite doors, built on cutting-edge material technologies, ensures outstanding thermal insulation. This solution not only minimizes energy loss but also creates a stable indoor microclimate — quiet, warm, and consistently comfortable. High energy efficiency contributes not only to everyday convenience but also reflects a conscious choice, supporting environmental responsibility and sustainable energy management.

DOORS AS EXTRAORDINARY AS YOU

UNIQUE AT EVERY SCALE

Imagine the moment your guests first arrive at your home. It is then that VIKKING composite doors become a silent ambassador of your style — a testament to refined taste and attention to detail. Each model is a carefully crafted composition of aesthetics and personal expression. The Elite collection captivates with its noble finish and uncompromising elegance, while the Vintage collection enchants with timeless forms imbued with character.

We offer a space for creation — one that allows you to tell your own story from the very first glance. By choosing VIKKING doors, you are choosing more than design. You are choosing an atmosphere that welcomes you every single day.

A MANIFESTO OF INDIVIDUALITY

YOUR HOME DESERVES MORE THAN THE ORDINARY

Imagine the moment your guests first step across the threshold of your home. It is then that VIKKING composite doors speak on your behalf — expressing your style, sophistication, and meticulous attention to detail. Each of our doors is a masterfully crafted story of who you are. From the Elite collection, exuding the utmost luxury, to the Vintage collection with its timeless charm, we offer limitless possibilities to create a first impression that will endure forever.

By choosing our doors, you are selecting more than a functional element of your home — you are choosing the emotions that greet you at your threshold every day.

DURABILITY – CONFIDENCE – SOLIDITY

PATENTED SYSTEM

Durability is the foundation of our composite doors. We have designed and patented a door system using the highest quality composites to create a structure resistant to all weather conditions, ensuring long-lasting quality and enduring aesthetics. As a result, our doors not only serve as a stylish feature of your home, but also provide an effective barrier against external elements.

EXTREMELY RESISTANT

Resistance to weather conditions, such as rain, snow, and UV radiation, is a defining feature of our doors. Thanks to innovative technological solutions, the structure remains free from warping or fading, making them not only durable but also requiring minimal maintenance.

AN INVESTMENT WITH GUARANTEE

Our composite doors come with an impressive warranty of up to 25 years, reflecting our full confidence in the durability and solidity of our products. This is not just a statement, but a commitment to maintaining the highest quality standards for many years, providing our clients with reassurance and peace of mind.

INDULGE IN COMFORT AND SECURITY

What if opening your door could be even easier?

The INSTINCT BY MACO locking system is a fully electronic solution for keyless front door locking. INSTINCT secures the door in a mechanical-automatic way, using the weight of the door leaf to ensure optimal compression. With the accompanying app, you also have complete access and control over your home.

E-key fingerprint scanner dLine

A biometric fingerprint reader elegantly integrated into the door. Keyless access, intuitive operation, and top-level security — technology that adapts to your lifestyle.

Sorex UniLock keypad

An intelligent solution that combines modern technologies in one refined design. Open your door the way you want — using a fingerprint, a code, a Bluetooth-enabled smartphone, or an RFID tag. UniLock offers freedom of choice in the spirit of smart home living.

HIGHEST SECURITY STANDARDS

Security in our composite doors is far more than just a feature — it is a fundamental design philosophy. We create not only an effective barrier against the outside world but also a true sanctuary of peace for you and your loved ones.

Our doors can be equipped with RC3 resistance class, meeting the highest standards of burglary protection and ensuring uninterrupted peace of mind.

Furthermore, the doors can be fitted with intelligent control systems, enhancing security to an even higher level. These advanced solutions enable real-time monitoring and remote management, giving users complete control over access to their home.

PREMIUM FINISHES

Colour is the language of emotion and style — in our composite doors, it becomes an expression of your individuality. Each shade in our palette has been meticulously selected, while our unique finishing technology, employing a traditional, centuries-old patination method, imparts both classic dignity and contemporary finesse. Let the colours become the opening note of an extraordinary story for your interior.

FULL COLOUR PERFECTION

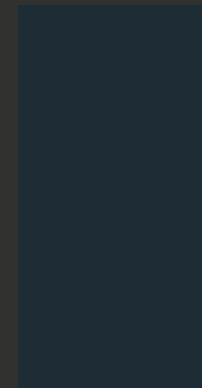

The smooth texture is the essence of modern elegance, and the RAL palette opens up a world of unlimited colour possibilities. Choose any shade that best reflects the character of your home, combining perfect aesthetics with exceptional durability. This way, every detail of your door becomes an expression of individual style and timeless class.

Effects that catch the eye

What's more, only with us do you have the unique opportunity to choose from special effects that take the aesthetics of doors to a whole new level: Pearl, Galaxy and Sand. These exclusive finishes give the door surface extraordinary depth, texture or subtle shine, creating a unique effect that you won't find anywhere else.

INNOVATIVE DESIGN

All information contained in this publication is provided for promotional purposes only and does not constitute a binding commercial offer. Due to printing conditions, the colours and patterns shown may differ slightly from the actual products. The individual production process, variations in grain, colouring, and surface texture of the doors, as well as the handcrafted creation of stained-glass decorations, contribute to the unique character of VIKKING composite doors and should not be considered binding. Any claims arising from differing interpretations cannot form the basis for a complaint, and in case of disputes, the reference document is the applicable industry standard. The manufacturer reserves the right to make technical improvements and modify the product range. All products are manufactured and equipped exclusively on individual, bespoke orders. Prior to installation, please consult the assembly, usage, and maintenance instructions, as well as the warranty terms; failure to comply may result in loss of warranty rights. We make every effort to ensure that our publications provide complete and accurate information about our offer; however, we do not accept liability for any potential inaccuracies. This publication is fully protected under copyright law. Any reproduction, including partial reproduction, requires the manufacturer's consent. Our composite doors and Real Wood windows are produced based on proprietary technological solutions. Their innovation is confirmed by granted international patent protection. Any unlawful infringement of intellectual property rights will be subject to claims for compensation. This offer is valid from 1 January 2025. All previous offers become void as of this date.

REAL WOOD[®] - innovative design

The unique decoration system developed by the VIKKING engineering team is protected by international patents. The surface decoration of PVC profiles using RW technology eliminates the need for profile foiling and ensures the everlasting durability of the achieved texture. Unlike wooden windows, Real Wood windows require no costly surface maintenance.

Invisible weld NANO-PERFECT[®]

Painted windows with invisible welds combine functionality with contemporary aesthetics – now available in any colour, perfectly matching your vision. Advanced technology conceals the seams, ensuring an exceptionally smooth finish, durability, and excellent airtightness. Their minimalist form emphasises an exclusive, modern character, offering complete freedom to personalise the appearance.

Magnetic threshold – subtle sealing technology

Every detail counts. The magnetic threshold provides exceptional airtightness and user comfort. Its mechanism activates as the door closes – gently lifting the sealing strip to form a precise barrier against cold and moisture. This solution ensures additional sealing without the need for visible thresholds or strips. Moreover, the magnetic threshold is fully barrier-free, making it perfect for modern homes and spaces requiring maximum convenience and accessibility. It is a blend of elegance, functionality, and innovation – a subtle yet effective detail that enhances the character of premium-class doors.

Comprehensive offer – excellence in every segment

The ARCTIC and TOP lines complement the VIKKING offer, creating a cohesive system of solutions tailored to every space and requirement. Thanks to compatibility between the series, products can be combined harmoniously – from the premium Ultimate and Vision models to the universal lines – without any compromise on quality or design.

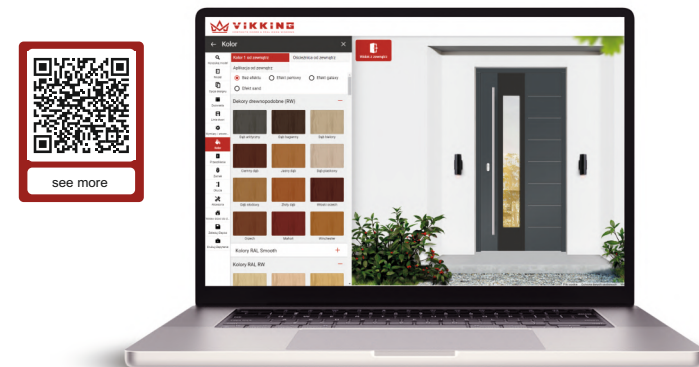

An innovation your offering cannot do without

Partnering with VIKKING guarantees access to innovative, customised composite doors that stand out not only for their design but also for their functionality and superior craftsmanship. A professional partner cannot afford to exclude these products from their offering – they are solutions that enhance portfolio appeal and elevate customer satisfaction.

100% customisation – doors tailored to client needs

VIKKING is a company that combines innovation, flexibility, and global experience. Our composite doors are crafted entirely to meet the individual expectations of clients across diverse markets – from unique design to functional solutions. Through continuous development and adaptability, we deliver products that cater to the most discerning tastes and requirements.
