

InDoors,
Open to More... www.indoors.ie

open the doors to your imagination...

The beauty and finish of **quality doors, sets the tone** for every room in your home.

They are unique, the one piece of furniture that travels through your entire home, room by room. **Doors help create the spaces that generate atmospheres**, from your favourite relaxing place, the buzz of the dining room or to the homely feeling after a long day.

With our commitment to excellence, innovation, and customer satisfaction we are delighted to present you with our new additions to the Indoors range.

Looking for some eye-catching décor? Why not start with the **New Feature Doors** from our **Vista Collection**, or browse our bestselling **Classic Styles**, refined over 50 years to allow seamless integration of traditional and modern homes.

Indoors market-leading door designs set the standard for style, quality, and innovation in the industry. Choose from black, grey, white primed, or natural wood finishes.

Our Classic and Modern door ranges emphasise craftsmanship and simplicity in your home.

Primed doors empower you to continually update your doors with the latest colour trends, or paint them white, for that timeless effect.

From glazed doors to let in more light, to solid timber finishes, where the rich texture of the wood alone is the styling you require.

Our Indoors collection has been carefully curated for you over 50 years of Irish consumer research, to balance style, finish and value.

Welcome to this season's collection from Indoors.

MODERN BLACK COLLECTION

Indoors is proud to introduce our latest innovation in interior design with the introduction of our **exclusive new Vista Feature Glazed collection**.

Crafted to elevate the aesthetic of hallways, living rooms, and kitchens, these doors boast ultra-slim vertical stiles and horizontal rails, setting **a new standard in modern elegance**.

The new Vista collection is **designed to complement** our Indoors classic and contemporary white primed doors.

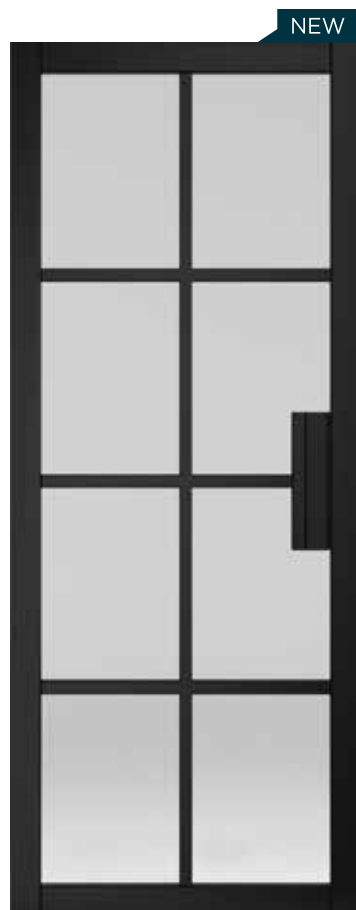

The premium primed black finish adds **a touch of sophistication** for those seeking to enhance the overall ambiance of their living spaces.

Indoors' Vista Feature Glazed Doors allow natural light to flow through spaces effortlessly and are **available in clear glass or reeded glass**.

FIREDOORS

Your door can be your greatest friend in times of emergency. Our Fire Door collection is designed and tested to keep you safe when the situation demands it. Solid, easy to maintain and well styled we recommend making this an essential part of your door selection. All our fire doors are independently tested and certified with audits regularly carried out at place of manufacture that cover design, performance and quality assurance. Always refer to relevant fire door certificates for full instructions on installation and compliance.

Our premium moulded firedoor range is an exquisite collection of finely detailed moulded panel doors in both classic and contemporary styles. The smooth finish gives a sleek modern look and feel.

SLIDING DOOR RAIL KIT

Manhattan Aluminum Rail
k1557702

Soft Close Mechanism
k1557706

Aluminium Cover
k1557704
**Also available in White (K1557716)
and Black (K1557717)**

The Indoors Manhattan Aluminium sliding door kit is the latest trend for home owners keen on “space saving”. Our aluminium sliding door kit can be used for both Pocket Doors (hidden from view, where doors slide into the wall) and wall mounted sliding door systems (the kit is visibly mounted above the door opening).

It's unique wheel and track system ensures the highest quality movement on the market. It comes with an optional soft close feature. For double door specifications, two kits will be required.

Each Kit is 2m long and can hold a maximum weight of 100kg, Suitable for all doors between 18-44mm (thickness).

LOFT

SLIDING DOOR RAIL KIT

Joinery Bracket
K155713

Soft Close Mechanism
K1557708

Our Loft Sliding Door Kit is a styling statement in itself. Designed to carry a single door, both door and kit combine visual aesthetics with functional space saving, ideal for the modern house or apartment. With smooth movement, it is suitable for all doors within the Indoors collection.

Each Kit is 2m long and can hold a maximum weight of 100kg, Suitable for all doors up to 50mm (thickness). See page 92 for details on our Sliding rail Kits and Accessories.

FibroTech Acoustic Panels

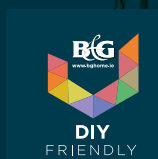

for ceiling and walls

NEW TO IRELAND

New from B&G, FibroTech acoustic panelling. FibroTech acoustic panels creates timeless beauty for both walls and ceilings as well as a sound absorbing surface for improved acoustics in your room.

FibroTech offers an extensive range of colours to choose from, and the panels can be installed horizontally as well as vertically. Our Scandinavian style timber finish panels are made with polyester, MDF and knot free real wood veneers. They are 100% FSC® certified. The polyester is made from recycled plastics. We also offer the latest white panel from the Unika range which is foil-wrapped and easy to clean, making it suitable for all areas including bathrooms & kitchens.

Simply scan the QR code to see our "How To" video on the DIY Friendly resources section of our website www.bghome.ie

Key Features & Benefits

- Sound absorbing acoustic panels
- Nordic interior design style
- Knot free real wood veneers
- Panel size: 22 x 605 x 2440mm
- Suitable for walls & ceilings
- Easily installed with glue and/or screws
- FSC® certified
- Black polyester is made of recycled plastic.

RADIATOR COVERS

The radiator cover collection from Tema aims to bring style and elegance to your home. Our radiator covers are effortless both in aesthetic and build, you can upgrade the look of your home by turning your radiator into a perfect piece of furniture for your living space that can be assembled in minutes!

What Tema radiator covers promise to deliver:

- Our radiators covers are designed to allow heat to flow freely
- Protect infants from dangerous hot surfaces
- Conceal unsightly radiators and provide a new piece of furniture for your home
- Can be used as a stand alone piece of decorative furniture where no radiator is present.
- Assemble within minutes and without professional help

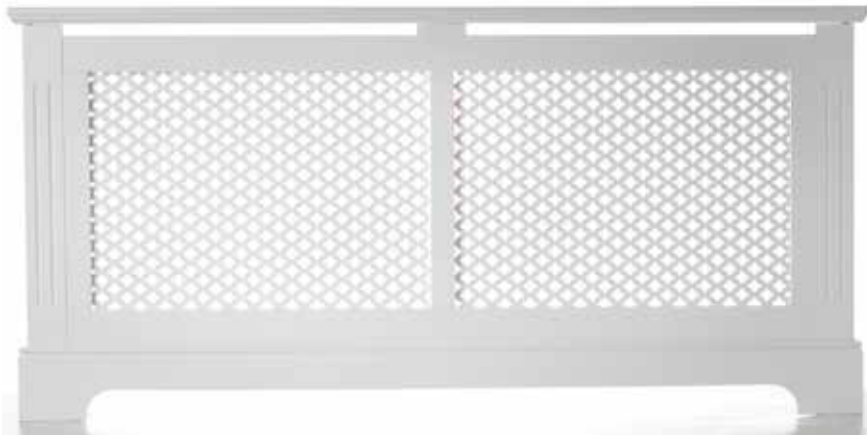

To view the full collection, please visit us at www.bghome.ie

VIEWING CONTEMPORARY ADJUSTABLE

TO ENSURE THAT YOUR DOORS LOOK AND PERFORM TO THE HIGHEST STANDARDS, Please Follow These Care And Installation Guidelines:

WHEN YOU RECEIVE YOUR DOORS

At the time of receipt of the doors inspect each thoroughly to ensure it is in perfect condition and has not been damaged during transit or storage. Report any visible defects within 3 days of receipt. Always use 2 people when lifting doors and lift by the edges and not by the glazing bars or panels. Allow your doors at least 7 days to acclimatise to the room where they will be fitted. Store them at normal room temperature (about 20 degrees) lying FLAT on 3 battens to allow the air to circulate. Ensure the room is dry and well ventilated and that the doors are kept out of direct sunlight.

TEMPERATURE & HUMIDITY

All timber naturally expands when it absorbs moisture, and contracts when it dries. It is vitally important that your doors are protected from extremes of heat and humidity. Never fit or store doors in a newly plastered room or building. Please allow at least three months to ensure the rooms have been heated and dried thoroughly. We recommend that rooms are maintained between 18 – 20 degrees Celsius and between 40% - 60% humidity. Extremes of heat, dryness or humidity can cause cracking or warping. If under-floor heating is installed, it is recommended that it is not kept at a high setting for prolonged periods and at least 3 coats of sealer are applied on the bottom edge of each door.

PRIMED/PRE-FINISHED DOORS – RESEAL AFTER ALTERING

When primed or pre-finished doors are already fully sealed, it is important to reseal all exposed surfaces after trimming or cutting out for locks and hinges. If the door needs resizing, and trimming removes all primer from its edge, you can refinish the edge by applying an undercoat followed by paint. For colour doors such as black or grey, please refer to our website or brochure for the specific RAL number required. Handle pre-finished doors with extreme care to ensure the surface is not damaged in any way. Doors should not be laid on their side or edge without protecting the surface with cardboard.

ALL PRE-GLAZED DOORS FITTED WITH SAFETY GLASS

For your safety, all our pre-glazed doors use toughened or laminated safety glass. Take care to avoid any impact to glass when hanging or fitting the hardware. For a superior finish, some of our pre-glazed doors may be glazed using the Cassette Glazing System, where the glass is an integral component of the door and this glass cannot be replaced. Glass should be checked thoroughly in daylight before hanging and any defects reported immediately.

GLASS MAINTENANCE

Glass may be cleaned using a soft damp cloth. Do not use any abrasives or cleaning fluids. Care should be taken when cleaning leaded or screen-printed glass as excessive cleaning can damage or remove the finish.

INSTALLING YOUR DOOR

Before you start, inspect your doors thoroughly on all sides. The installation of the doors constitutes acceptance that the door is free from visible defects at the time of hanging.

Any slight roughness on a door caused by the primer, or small gaps, can be lightly sanded. Wood filler may be necessary to achieve a perfect finish.

If you need to trim the door, reduce equally on both sides by no more than 5mm. The top and bottom of the door should not be reduced by more than 10mm to maintain the proportions and stability of the door. Do not fit locks where the stile meets the mid-rail, as this could weaken the door Joints. Keep the lock cavity to a minimum. Locks etc. must be installed before hanging the door and always use 3 hinges. Care should be taken to ensure hinges are fitted in perfect alignment. When fitting double doors we recommend using a T-Rebate strip.

FINAL FINISHING PRIMED DOORS

When the Primed door is hung, it should be finished immediately with a high quality Paint sealer. Always follow the paint manufacturers' instructions for the paint to be used. All surfaces of the door must be painted at the same time to prevent moisture imbalance, do not finish one side of the door only.

CARE AND MAINTENANCE

Regular care and maintenance of the door finish will enhance the appearance and prolong the life of your doors by preventing breakdown of the finish and protecting the timber from deterioration. Panels are floating and can expand or contract to allow for variations in temperature. This can occasionally expose paint lines along the edges. This is not a fault and can easily be sanded and refinished. Regularly clean glass with warm, soapy water. Avoid using abrasives or excessive scrubbing as this may cause scratches or remove designs.

LIMITED 12 MONTH GUARANTEE ON INDOORS

All Indoors products are guaranteed against any manufacturing faults or defects for a period of 12 months from date of purchase. In the unlikely event that there is any defect in the product arising from manufacturer or material fault we will immediately replace the door but no liability can be accepted for other consequential costs such as painting storage, installation etc. For this guarantee to be valid, all the above guidelines must be followed. B&G will not be liable for any door repaired, returned or replaced without prior consent by B&G. Timber is a naturally grown product which makes every door unique as such there can be a certain amount of colour variation in the timber or the veneer. Uniformity of grain or knots cannot be guaranteed. Warping is considered as a fault only where deviations exceed tolerances as outlined by BS 5277 Part 1.
